

International Safety Data on the Solid Waste Industry

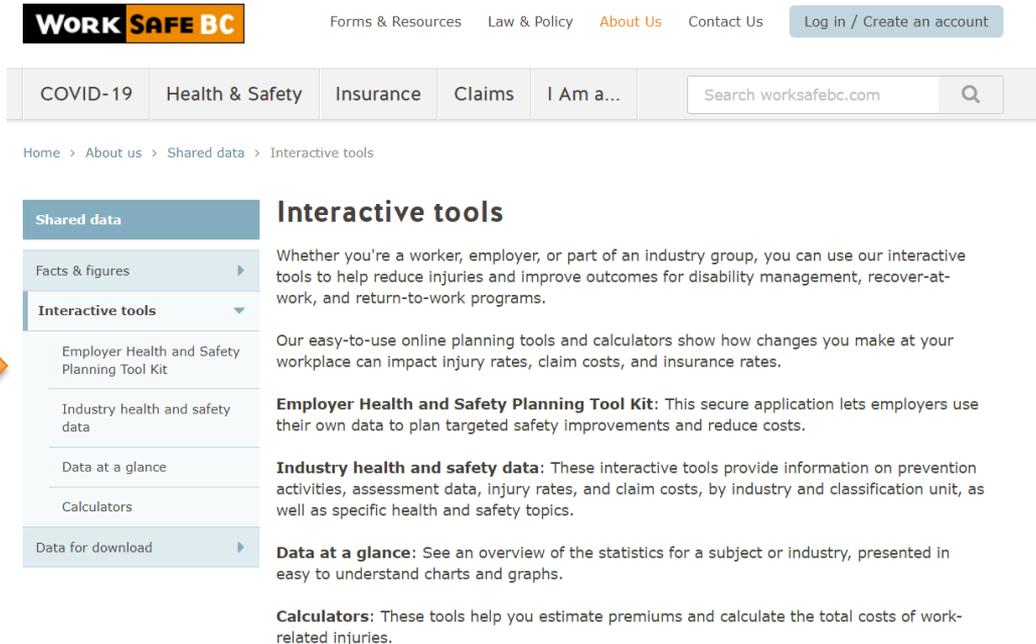

WorkSafeBC's Data Perspective

November 2021

WorkSafeBC's Primary Data Sources

- Claims
- Prevention Activities
- Research projects
- Risk analysis - monitoring emerging trends (ex. EV batteries and fire risk)
- Exploring new methods (ex. COVID algorithm and EIIR word mining)

Interactive tools

Whether you're a worker, employer, or part of an industry group, you can use our interactive tools to help reduce injuries and improve outcomes for disability management, recover-at-work, and return-to-work programs.

Our easy-to-use online planning tools and calculators show how changes you make at your workplace can impact injury rates, claim costs, and insurance rates.

Employer Health and Safety Planning Tool Kit: This secure application lets employers use their own data to plan targeted safety improvements and reduce costs.

Industry health and safety data: These interactive tools provide information on prevention activities, assessment data, injury rates, and claim costs, by industry and classification unit, as well as specific health and safety topics.

Data at a glance: See an overview of the statistics for a subject or industry, presented in easy to understand charts and graphs.

Calculators: These tools help you estimate premiums and calculate the total costs of work-related injuries.

Industry Health and Safety Data

Industry risks: Prevention data for planning workplace health and safety in B.C.

[Industry risks: Prevention data for planning workplace health and safety in B.C.](#) 

Employers can use this tool to understand WorkSafeBC's injury prevention activities. You can access data from the past ten years showing workplace inspections, orders, and penalties across different industries.

This information can be used to:

- Identify trends and patterns of prevention activities in specific industries and regions
- Explore and understand the different levels of violations cited in each industry
- Support your own research, reports, and business planning

Serious injuries: Data about workplace injuries in B.C. 

Work-related deaths: Data about workplace deaths in B.C.

Industry Trends:

- **Overexertion – an issue with all industries**
 - Conduct ergonomic risk assessments
 - Review employer claims data and incident investigations to identify the source
 - Share knowledge with industry
- **MVIs – low counts but high costs**
 - MVIs are preventable – seat belt use is necessary
 - Road Safety At Work
- **Fractures – shows where severity of injury occurs**
 - Review employer claims data and incident investigations to identify the source
 - Share knowledge with industry

Inform Industry:

- **Look at all the pieces**
 - Compare regulator data to your own employer & industry data
 - We provide high level insights and you can supply industry level specifics
- **We are all in this together**
 - Reducing claims at employer level improves your experience rating
 - Reducing claims at an industry (CU) level reduces your base premium rate
